

Staff Wish List

Artist In Residence: Gill Chater – Spring Musical \$3500

We have booked Gill Chater, a former teacher in the District, to manage and produce our musical once again this year. The estimate quote includes Gill's fee and anticipated additional costs.

Reflex Math: \$2500

Reflex Math is computer program that is used by many elementary schools in our District. It focuses on helping children learn the basic addition, subtraction, multiplication and division facts. These basic facts are essential tools to enable children to master more complex operations and problems in math.

Guided and Home Reading Instructional Sets: \$2500

Instructional sets of guided and home reading books are a key part of reading instruction. These sets are very expensive and have been depleted at Prospect over the years. Our plan is to supplement our current resources by purchasing sets for all of the classes in our school.

PE/Playground Equipment: \$800

Wear and tear on PE and playground equipment requires us to purchase replacement equipment each year. Our plan is to purchase equipment to be used by all classes in the gym and on the playground.

Wireless Microphone: \$500

This would be used for events at the gym such as assemblies and other whole school events and presentations.

Science Ventures: \$525

This program features Uvic science students presenting programs and experiments to each of the classes in the school. It is an excellent program and which both the children and their teacher's enjoy.

Earth Quake Supplies: To Be Determined

The School District now requires all schools to adhere to a standardized set of supplies in their earth quake containers. Although we have a good supply of equipment and supplies already, we will be required to upgrade.

Whole School Field Trips: \$2,000

This would cover expenses for 4 whole school field trips: Goldstream Park, Skating, Track Meet & Beach Day.
